

Compatibilizer

A series of LEP compatibilizer is the copolymer of maleic anhydride grafted polypropylene (PP-g-Mah), with the properties of low smell and low volatile organic compounds (low VOC), etc., which is suitable for manufacturing auto interior components and so on; It can also serve as interfacial modifiers between PP and fillers, such as glass fibers or mineral, etc. Adding 3%-5% of it can improve the coating performance and the printability of PP.

Product Specification

Product No.	Melt Flow Rate(MFR) (190℃,2.16kg,g/10min)	Grafted Rate(%)	Density(g/m ³)	Substrate	Color
LEP-1A	90-130	Medium	0.90-0.92	PPB	White
LEP-1B	90-130	High	0.90-0.92	PPH	White

Performance Comparison

Product Photo (MAH-g-PP Pellets)

Dosage

3%~5%, glass fiber reinforced PP.

Packing, Storage And Transportation

The product is packed in 25Kg kraft paper bag lined with a plastic bag.

According to the requirement of non-dangerous goods, it is stored and transported under dry conditions to avoid sunlight and rain.
